**“Second Dose” Moderna Vaccine Clinics Scheduled for This Week
Tyler, Texas (Tuesday, March 16, 2021)**

Persons who received their first **MODERNA** vaccine on February 3rd or on February 4th at the Harvey Convention Center in Tyler, or on any day in January, are invited to receive their 2nd Moderna vaccine either this **Thursday March 18th or Friday March 19th**. at the Harvey Convention Center in Tyler between the hours of 9:30 a.m. and 4:30 p.m.

“Anyone interested in receiving their 2nd Moderna vaccine **MUST** make an appointment before traveling to the Harvey Convention Center in Tyler,” says George Roberts, NET Health CEO. “Please select your preferred day and time visiting [NETHealthCOVID19.org](https://www.NETHealthCOVID19.org) and selecting the ‘Vaccine Updates’ link. On this webpage, any eligible person can click the ‘2nd Moderna Vaccine’ link and make their own appointment to receive their second Moderna vaccine.”

Persons who do not have internet access can make an appointment to receive their 2nd Moderna vaccine over the phone by contacting our COVID Call Center at (903) 617 – 6404.

To receive your second Moderna vaccine on any of the listed days above, you will need to have your "CDC COVID-19 Vaccination Record Card" upon arrival. This is the small white card given when a person receives their first COVID vaccine. The second vaccine still provides immunity regardless of when the person received their first COVID vaccine.

“After you have received both doses of the COVID vaccine, you are still advised to continue practicing the evidence-based COVID-19 safety protocols,” continues Roberts. “These reminders include wearing a mask, social distancing, staying home when you are ill, and avoiding gatherings with persons outside of your immediate household. Your immune system will need at least 1 – 2 weeks before the 2nd dose of a COVID vaccine takes full effect.”

NET Health will continue to schedule appointments for COVID Vaccine Clinics in future weeks. Appointments are only created based upon our available supply of COVID vaccines and upon the date that our NET Health Immunizations Department physically receives more doses of COVID vaccines.
